

# ProtecTable

## The Protected Search-Counter

Designed to facilitate fast and safe handling of suspicious objects found during the screening of personal belongings.

Provides 360° lateral protection against blast pressure and fragmentation

Proven to save lives and avoid serious injury

Time of exposure to danger is minimized and maximum protection to the public and security staff is achieved

Adjusted for EOD; allows convenient remote lifting of the object for examination or removal

Aviation model with opening size according to IATA carry-on luggage specifications

X-Ray capability to scan the suspect package while in the container

X-rayed with the Fox-Rayzor by Vidisco

Applications include Airport Security and Aviation Authorities, Rail Stations and other Mass Transportation facilities, Embassies and Government facilities, Border crossings, Shopping Malls and other public venues

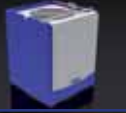

# The ProtecTable in action

1. Bag is placed on the search counter for manual screening
2. In the event a suspicious object is found in the bag during the search, the operator simply pulls the handle
3. Bag falls into the Blast Containment Receptacle inside the ProtecTable (onto a shock-absorbent material)
